PROFILE

AI engineer building and deploying backend AI systems, LLM/RAG pipelines, agentic workflows and real-time voice AI. Experienced with Python, FastAPI, PostgreSQL, AWS, Docker, Linux and CI/CD.

EXPERIENCE

AI Developer / Next AI Pvt. Ltd

NOV 2025 - PRESENT

- Own a real-time voice-to-voice AI system supporting 1,000+ concurrent users, integrated into an app with 500k+ downloads.
- Build speech processing, FastAPI integrations, orchestration and scalable deployment workflows.
- Fine-tuned Gemma 3 for customer support and Piper TTS; deployed Omni Voice and Qwen3 TTS inference.
- Prompt-engineered 48 English-learning AI characters. Built a customer-support agent with RAG and local LLM inference; exploring local Nepali STT, LLM and TTS components.

Full-Stack Developer / Simal

JUN 2025 - PRESENT

- Built an end-to-end multi-tenant SaaS mobile app with React Native, Supabase and PostgreSQL; added a generative UI dashboard for reporting.

TECHNICAL SKILLS

AI / LLM

LLM APIs, RAG, agentic workflows, structured output, embeddings, document chunking, prompt engineering, voice/audio

Backend / Cloud

Python, FastAPI, Flask, REST APIs, Docker, AWS, Linux, Git, CI/CD, Jenkins, WebRTC, WebSockets, LiveKit, Grafana

Product / Data

JavaScript, Java, C++, Dart, React Native, PostgreSQL, MySQL, MongoDB, Supabase

ACHIEVEMENTS AND EDUCATION

NASA Space Apps Challenge 2023 — Honorable Mention · Hackathon winner
AWS Certified Cloud Practitioner · AWS Machine Learning Fundamentals
BSc (Hons) Computing with Artificial Intelligence · 2023–2026
